

According to the current EU regulations, products or their components which contain a concentration of dimethyl fumarate of over 0.1 mg/kg may not be put into circulation.

No dimethyl fumarate (CAS No.: 624-49-7) is used by us in the manufacturing of our products. We cannot, however, safely rule out the possible contamination of the material during the production of raw materials by our suppliers, because analysis of the material to that effect is not conducted by us within the scope of quality assurance.
