

Under the Toxic Substances Control Act (TSCA) Section 6(h), regulations have been issued by the U.S. Environmental Protection Agency (EPA) restricting the import and use of five persistent, bioaccumulative, and toxic (PBT) chemicals. These chemicals are:

- PIP (3:1) (Phenol, isopropyliertes Phosphat (3:1), CAS 68937-41-7)
- DecaBDE (Decabromdiphenylether, CAS 1163-19-5)
- 2,4,6 TTBP (2,4,6-tris(tert-butyl)phenol, CAS 732-26-3)
- HCBd (Hexachlorbutadien, CAS 87-68-3)
- PCTP (Pentachlorothiophenol, CAS 133-49-3)

We do not produce the raw material for our plastic injection molded articles ourselves, but obtain this from upstream suppliers.

Since the said substances are so far only sporadically restricted in a few countries and e.g. (except DecaBDE) are not part of RoHS/REACH/California Prop65, information on these substances is not yet included in the confirmations received from our suppliers so far.

Nor can we rule out the presence of these substances in the material with certainty, because we do not carry out material analyses of this kind as part of our quality assurance.

We are currently actively working to obtain the information from our suppliers. Unfortunately, we have not yet been able to obtain any conclusive information at this point in time and are therefore unable to provide you with a final statement on this matter.

As soon as reliable information is available, we will respond to your inquiry accordingly.
